WEEKLY MORBIDITY REPORT
EXPLANATORY COMMENT

This report presents each week the annual admission rates per 1000 average strength for certain communicable diseases, venereal diseases, and all causes combined (diseases, injuries and poisonings). Source material is the weekly communicable disease reports submitted to BuMed by all shore stations within the continental limits of the United States.

Admission rates are calculated on an annual basis to facilitate comparison with corresponding annual, quarterly or monthly figures. Such annual rates of admission indicate the number of admissions per 1000 average strength which would occur over a year's time if the current week's experience continued for a year. They are obtained as follows:

$$\frac{\text{Number of Admissions During the Week} \times 52}{\text{Average Strength for the Week}} \times 1000$$

In order to make this report promptly available the figures contained herein are presented, in general, as reported. The symbol # indicates that current data are not available. In such cases, the most recent data are utilized.

Shore stations with an average strength of 500 or more are listed individually; stations under 500 strength are grouped.

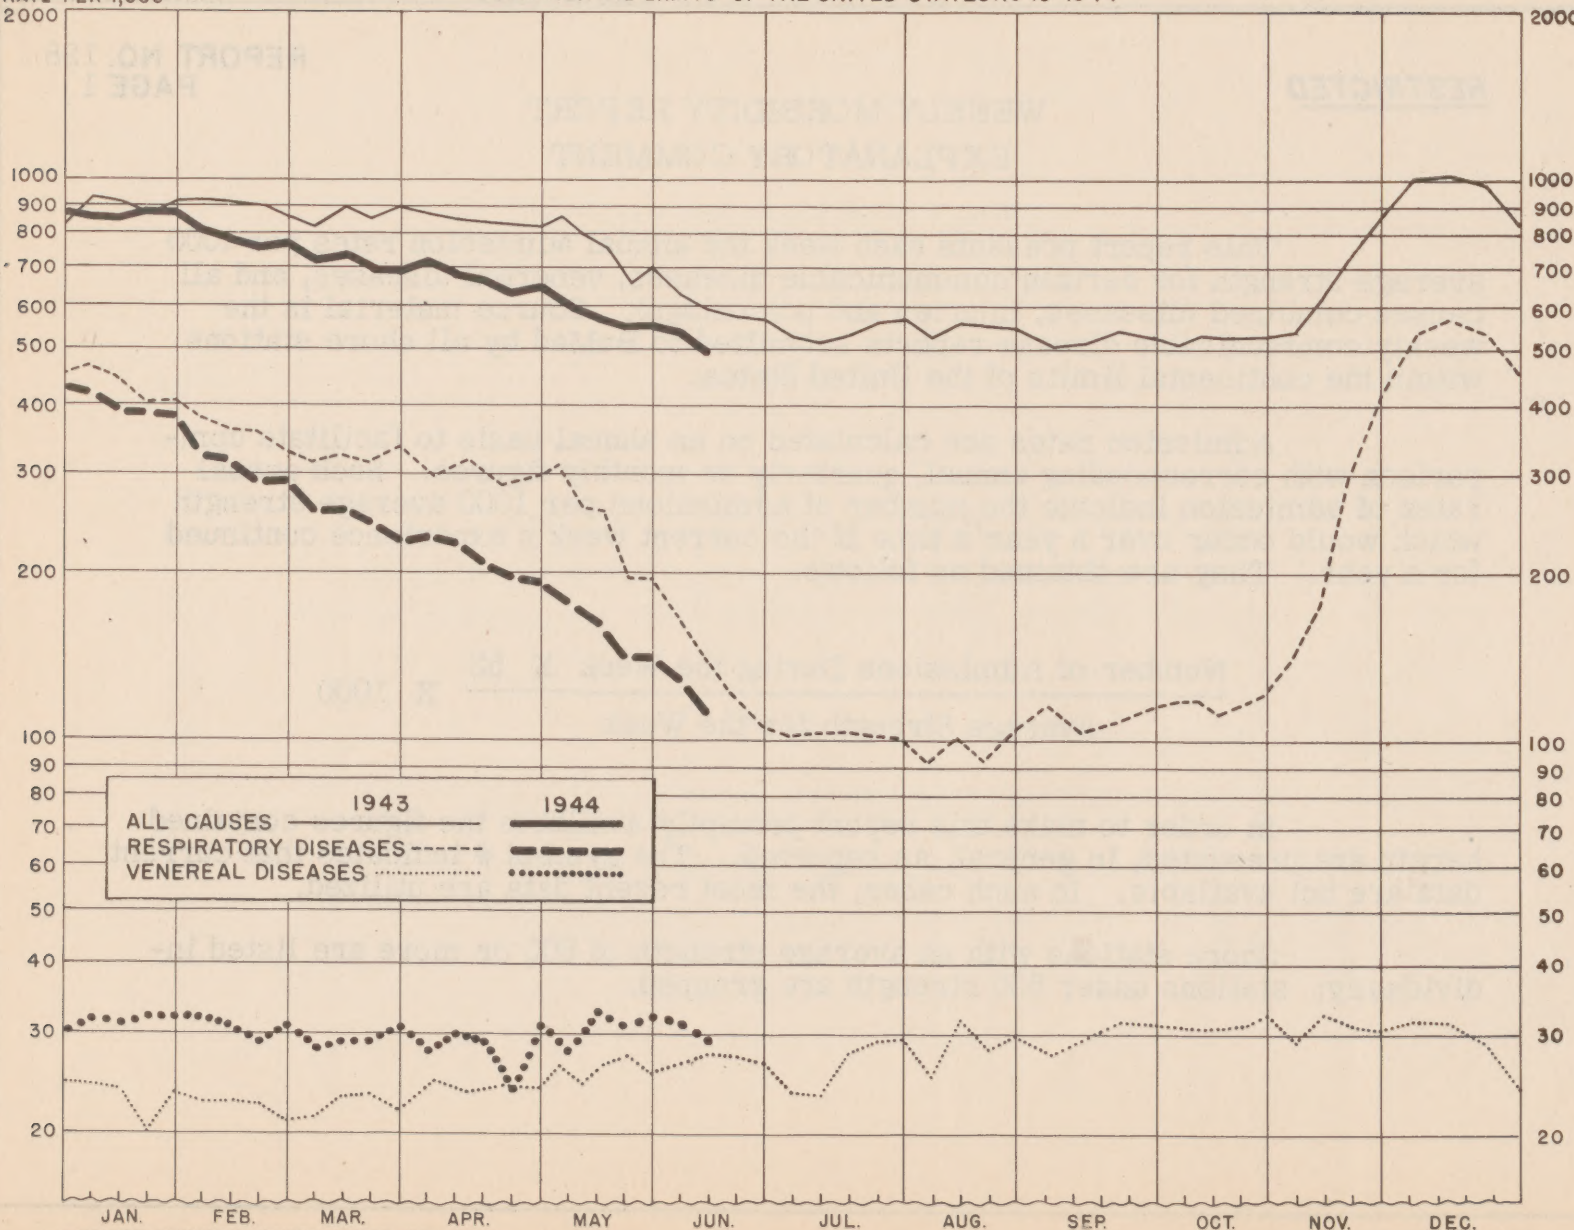

RESTRICTED

PAGE 2

RATE PER 1,000
2000

2000

*INCLUDE: CATARRHAL FEVER, ACUTE; INFLUENZA;
PNEUMONIA-BRONCHO, LOBAR & ATYPICAL;
TONSILLITIS, ACUTE (1944 ONLY) PHARYNGITIS, ACUTE (1944 ONLY).

CURRENT TRENDS

Week Ending 10 Jun 1944

The admission rate for All Causes dropped this week to 490, a rate well below that recorded for any week of 1943. The highest rate (847) was reported for the Potomac and Severn River Commands. The lowest rate (387) was reported for the 4th District.

The respiratory disease curve dropped sharply continuing the trend which has been downward since the week ending Dec. 11, 1943. Throughout 1944 to date the curve for these infections has stood below the 1943 curve. The curves turned upward only in the 1st, 6th, and 7th Districts. The highest rate (185) was reported from the 13th District, the lowest (65) from the 6th District.

The curve for the venereal diseases continued downward this week. The highest rate (38) was reported for the 5th District, the lowest rate (19) for the 9th District.

Influenza and Catarrhal Fever. The downward trend for these infections continued and the curve stands well below any point recorded in either 1942 or 1943. The highest rate (123) was reported by the 13th District, the lowest (40) for the Potomac and Severn River Commands.

Pneumonia--Broncho and Lobar. A new low point of 1 was established for these infections this week, a point well below any recorded in 1942 or 1943. The highest rate (4) was reported for the 13th District. The 4th District reported no cases.

Pneumonia, Atypical. The rate for this disease continued for the fourth consecutive week at 2. A downward trend has been evident since the week ending Jan. 22. The highest rate (4) was reported for the 11th District. Three Districts and the Potomac and Severn River Commands reported no cases.

Tonsillitis and Pharyngitis, Acute. The curve for these infections continued downward. The 11th District reported the highest rate (63), the 3rd District the lowest rate (19).

CURRENT TRENDS--CONTD.

Rheumatic Fever, Acute. After a sharp rise in the previous week the rate dropped abruptly to 2 this week. The 1944 curve, however, stands above the 1943 curve for the corresponding period. The highest rate (10) was reported by the 13th District. The 4th and 6th Districts reported no cases.

Scarlet Fever. The rate for scarlet fever continued at 3. The curve stands below the 1943 curve but considerably above the 1942 curve for the corresponding period. The curve turned upward in only one District (the 11th). The highest rate (22) was reported by the 13th District. Five Districts and the Potomac and Severn River Commands reported no cases.

Cerebrospinal Fever, Meningococcic. The rate for this infection dropped again this week. The curve now stands at a point below any point registered in 1943 or in 1944 to date. The highest rate (1) was reported for the 4th District. Eight Districts and the Potomac and Severn River Commands reported no cases.

Malaria. The malaria rate for the fifth consecutive week was reported at 2. This is the fourth consecutive week in which the 1944 rate has stood below the 1943 rate. The highest rate (5) was reported for the 11th District. The 4th District reported no cases.

Measles. The measles curve continued the downward trend expected for this season of the year. The 11th District reported the highest rate (6). The 4th District and the Potomac and Severn River Commands reported no cases.
